

# In your area

# **Risley to Bamfurlong**

High Speed Two (HS2) is the Government's planned new high-speed railway for the UK. HS2 Ltd is the company responsible for developing and promoting the high-speed rail network. In July 2017, the Government confirmed the route for the next phase of HS2: Crewe -Manchester and West Midlands - Leeds (Phase 2b). Since then, there have been consultations on the working draft environmental statement in 2018 and on other proposed changes to the route in 2019.

Introduction

We've produced this information to update you on the route in your area. It includes:

- a summary of how the design has developed since July 2017, including the decisions made after the 2019 design refinement consultation;
- how to find out more about the project; and
- how to get in touch with us.

— HS2 route overground

**Existing railway** 

## **Development of the Phase 2b route**

Following the Oakervee Review into HS2, the Government committed to building the high-speed railway and preparing an Integrated Rail Plan (IRP) for the North and the Midlands. The IRP will look at the best way to deliver Phase 2b, Northern Powerhouse Rail, Midlands Rail Hub and other major rail schemes. The aim is to maximise the benefits of transport investment in the North and the Midlands. The IRP is guided by a Rail Needs Assessment carried out by the National Infrastructure Commission.

While this work is going on, the Government wants to bring forward legislation to take the railway from Crewe to Manchester – the Western Leg of Phase 2b – as soon as possible. Although plans for HS2 may change following the IRP, significant change is less likely for the Western Leg. The HS2 route from Birmingham to Leeds – the Eastern Leg – is also being considered as part of the IRP, and the Government will set out our next steps on the legislation for this section of route when that work is complete.

As part of plans for a hybrid Bill for the Western Leg, the Secretary of State for Transport has responded to a previous consultation and launched a further consultation on refining the design of the route. The consultation launched today includes some changes, but there are none in your area.

You can find out more about these consultations here: **www.hs2.org.uk/phase2b** 

## How the design is developed

#### **Moving excavated materials**

New earthworks, such as embankments and cuttings, are needed to support the new railway. This means moving large quantities of materials from one place to another along the route.

Where possible, excavated material will be reused to create the new embankments. However, this isn't always possible, as there may not be enough of the right quality material. One option is to bring the material from somewhere else. In doing this, we want to minimise the impact on the environment and road network.

To help reduce traffic, we use temporary haul roads inside the construction boundary to move material from one location to another. We can also use borrow pits – a common feature of major rail and road schemes – to help reduce traffic and cover any shortages in the right quality material.

A borrow pit is an area where material can be excavated and used for construction and where surplus material can be placed. Once a borrow pit has been used for excavating material for embankments, it is filled in with left-over material and the land is reinstated. Excavated material from the tunnels being built at Crewe and Manchester will also be used to help fill in the borrow pits.

Borrow pits can substantially reduce the number of vehicles on local roads – vehicles that would otherwise be needed to transport materials to and from quarries.

Borrow pits are not needed in every community area.

#### **Utilities**

In some locations, the HS2 route crosses utility infrastructure, including water, sewers, electricity, gas and telephone. We will need to divert and protect some of these utilities before we build the railway.

We are working closely with utility companies to plan this work and avoid disrupting services. Our latest plans show the land we will need for the utilities work.

### **Ground investigations**

Ground investigations involve examining the soil, rocks and groundwater below the surface. We need this information so we can design structures like bridges and viaducts. This will help us to build HS2 safely and efficiently.

The work includes non-intrusive investigations using ground-penetrating radar to build a digital picture of what is underground, including any utilities like water pipes. We also drill into the ground and take samples for testing.

We have started our survey work on parts of the 2b route. We'll continue to talk to communities and stakeholders to ensure everyone is informed before work begins in their area.

# Changes to the scheme in your area

We are continuing our design work to make sure we build the best highspeed railway for Britain. As a result, you may see updates to the design since our last published information in addition to the proposals we're consulting on. Our Phase 2b route-wide update will show you all the changes for your area.

This is a summary of the changes for your area:

- extending the M62 west viaduct to incorporate Holcroft Moss, replacing the previously proposed embankment;
- realigning the A574 Warrington Road to reduce the impact on the playing fields and listed buildings south of Culcheth;
- · building a bridge over the track west of Wigshaw Lane;
- changing the size and/or location of satellite compounds;
- utility works
  - i. near Moss Farm, Glazebrook
  - ii. off Slag Lane, Lowton
  - iii. off Lightshaw Lane, Golborne
  - iv. off Lily Lane, Bamfurlong
- · new telecommunications sites;
- · works to public rights of way;
- auto-transformer stations north of the M62 and east of B5207 Wilton Lane;
- · a pumping station off Carr Lane, Lowton;
- realigning the A573 Wigan Road to bring it closer to the West Coast Main Line, including amended access to Lightshaw Lane; and
- changing the railway connections to the West Coast Main Line near Bamfurlong.

We are committed to being a good neighbour. It's one of our guiding principles. We aim to respect the communities affected by HS2, listen to your concerns and resolve issues.

The table below sets out changes we've made to the design as a direct result of your feedback.

Location	You said	We did
Warrington Road	You told us that realigning Warrington Road in Culcheth would significantly affect Culcheth Athletic Football Club fields and Newchurch Old Refectory.	We've changed the design of Warrington Road so that it runs to the western side of the current alignment. This will reduce the impact on the football club and Newchurch Old Refectory.

Location	You said	We did
Wigshaw Lane	You said the closure of Wigshaw Lane in Culcheth would prevent residents of Croft getting to community facilities in Culcheth. You also said that the length of the diversion was unacceptable.	We've changed the design so Wigshaw Lane is realigned and remains open.
Wilton Road	You were concerned about the realignment of the junction of Wilton Road and Kenyon Lane as well as the realignment of Wilton Lane.	We've changed the design so there'll be no change to the junction. We've also reduced the length of the realignment of Wilton Lane.
Lowton Junior and Infant School	You were worried about the location of the compound between Newton Road and the East Lancashire Road in Lowton and the impact on Lowton Junior and Infant School.	There is nowhere else suitable for the compound, which supports the works to build the Lowton cutting and the A580 East Lancashire Road temporary realignment. However, we've moved the compound further from the school boundary. The Code of Construction Practice will ensure that issues such as dust and noise are kept to a minimum.
Hesketh Meadow Playing Fields	You were concerned about the loss of Hesketh Meadow playing fields in Lowton.	We've worked with the local authority and have found an alternative location for the playing fields in an area off Sandy Lane.
Byrom Hall Wood	You were concerned about the loss of public footpaths in Byrom Hall Wood.	We've provided access for Golborne Footpath 31/10 under HS2. This will then join existing routes to make circular routes on both sides of the railway. Golborne Footpaths 33/10 and 30/10 will be diverted temporarily, but will be open at all times.

# **Next steps**

## **Hybrid Bill – getting permission to build the railway**

Submitting a hybrid Bill to Parliament is how the Government gains permission to build this nationally important infrastructure. Subject to the outcome of the IRP, we are preparing a Phase 2b hybrid Bill for the route between Crewe and Manchester. It should be deposited, or put before Parliament, in early 2022 or sooner if possible.

Once the Bill has been deposited, you'll have another opportunity to comment on the design and for changes to be made.

More information can be found at: www.hs2.org.uk/phase2b

# **Keeping you informed**

We are committed to keeping you informed about work on HS2. This includes making sure you know what to expect and when to expect it, as well as how we can help.

### **Residents' Charter and Commissioner**

The Residents' Charter is our promise to communicate as clearly as we possibly can with people who live along or near the HS2 route. www.gov.uk/government/publications/hs2residents-charter

We also have an independent Residents' Commissioner whose job is to make sure we keep to the promises we make in the Charter and to keep it under constant review. Find reports at: www.gov.uk/government/collections/hs2-ltdresidents-commissioner

You can contact the Commissioner at: residentscommissioner@hs2.org.uk

#### **Construction Commissioner**

The Construction Commissioner's role is to mediate and monitor the way in which HS2 Ltd manages and responds to construction complaints. You can contact the Construction Commissioner at: complaints@hs2-cc.org.uk

## **Property and compensation**

You can find out all about HS2 and properties along the line of route by visiting: www.gov.uk/ government/collections/hs2-property

Find out if you're eligible for compensation at: www.gov.uk/claim-compensation-if-affected-by-hs2

## Holding us to account

If you are unhappy for any reason, you can make a complaint by contacting our HS2 Helpdesk team. For more details on our complaints process, please visit our website: www.hs2.org.uk/how-to-complain

# Contact us

Our HS2 Helpdesk team are available all day, every day. You can contact them by:

Freephone **08081 434 434**
